

Software Development Fundamentals Lab – I [24B15CS111]

Lab 4

NOTE: All students must submit the programs (code with running output) of this assignment in doc format to their respective faculty of Lab. as per the file naming convention Enrollment No._Assignment No.

1. WAP in C to check greater value between two values inputted by user
2. WAP in C to check whether given number is +ve or -ve.
3. WAP in C to check whether given number is even or odd.
4. Write a program to check whether the input character is Vowel or consonant?
5. Write a program in C, take student age as an input. If his age is greater than or equal to 18 then show the message. You are eligible for voting, otherwise show the message. You are not eligible for voting.
6. Write a program to find out if the year entered is a leap year or not.
7. WAP that will take the marks of a student in five subjects, Computer, Social Science, Maths, English and Hindi. It will calculate the percentage and print the grade sheet according to given conditions:
If percentage $\geq 90\%$: Grade
A If percentage $\geq 80\%$:
Grade B If percentage $\geq 70\%$
: Grade C If percentage $\geq 60\%$
: Grade D If percentage $\geq$
40% : Grade E If percentage $<$
40% : Grade F
8. Write a C program that will take the amount from user and print minimum number of notes (Rs. 500, 100, 50, 20, 10, 5, 2, 1) required for the amount. For example: Input amount: 576 Output
Total number of notes: 500: 1, 100: 0, 50: 1, 20: 1, 10: 0, 5: 1, 2: 0, 1: 1
9. The gross salary of an employee in a firm is calculated on the basis of the following Formula:
Gross = Basic + DA+HRA.
Write a C program to input basic salary of an employee and calculate gross salary according to given conditions.
Basic Salary ≤ 10000 : HRA = 20%, DA = 80%.
Basic Salary is between 10001 to 20000 : HRA = 25%, DA = 90%.
Basic Salary ≥ 20001 : HRA = 30%, DA = 95%

10. Write a C program to input side of a triangle and check whether triangle is valid or not using if else. How to check whether a triangle can be formed or not if sides of triangle are given using if else in C programming. Logic to check triangle validity if sides are given in C program.
